

Salahaldin Mohamed Salahaldin Abdalla

IT TECHNICAL SUPPORT ENGINEER | IT OPERATIONS | DATA ANALYSIS

Giza, Egypt | +20 10 3782 8139 | 29DevSalah@gmail.com | linkedin.com/in/salahaldin291/

PROFESSIONAL SUMMARY

Computer Science graduate and IT Technical Support Engineer with hands-on experience supporting end users, troubleshooting hardware/software issues, and maintaining day-to-day technology operations. Supports IT activities across two branches in an engineering and construction environment, with complementary strengths in networking fundamentals, cybersecurity awareness, data/statistical analysis, structured reporting, and AI-assisted productivity. Brings analytical problem-solving, careful verification, and a practical approach to improving workflows.

PROFESSIONAL EXPERIENCE

IT Technical Support Engineer | SEVEN HANDS FOR ENGINEERING SERVICES & CONSTRUCTION | Oct 2026–Present

- Support day-to-day IT operations across two company branches, troubleshooting employee computers, software, peripherals, connectivity, and related technical issues.
- Install, configure, replace, and relocate workstations, monitors, cables, and other computer equipment to support employee and engineering-team productivity.
- Help identify and troubleshoot malware-related incidents, contributing to timely technical response and recovery within assigned responsibilities while minimizing operational disruption.
- Organize and analyze operational information; prepare reports, surveys, summaries, and statistical interpretations for engineers and internal stakeholders.
- Use AI tools for research, information processing, and workflow support, verifying generated outputs and exploring practical improvements to repetitive reporting tasks.

IT Help Desk Engineer | HCC | 5 months

- Provided first-line end-user support by troubleshooting hardware and software issues and assisting with workstation setup.
- Logged and tracked support tickets to support issue follow-up and resolution.
- Installed and configured Microsoft Office, Adobe applications, and other workstation software; supported basic user-account and setup needs.

TECHNICAL SKILLS

IT Support: Hardware/software troubleshooting, Windows installation and configuration, workstation setup, software installation, user support

Networking: TCP/IP, DNS, DHCP, LAN/WAN, IP addressing and subnetting, basic network troubleshooting

Systems & Security: Windows, Linux/Kali Linux, Windows Server fundamentals, cybersecurity concepts, network security awareness, access-control concepts

Data & AI Workflows: Data organization, statistical interpretation, reporting, AI-assisted research and information processing, structured prompting, output verification

Programming & Tools: Python, C#, C++, JavaScript/TypeScript, SQL, MySQL, MongoDB, Git/GitHub, Visual Studio, VS Code, Microsoft Office, command line/terminal

SELECTED PROJECTS

- IT & Networking Labs: Practiced Windows/Linux configuration, TCP/IP concepts, DNS/DHCP, network troubleshooting, and Linux command-line tools in learning/project environments.
- Full-Stack Development: Built academic/personal applications using Python, React, Next.js, TypeScript, C#, SQL, and databases; troubleshoot code, dependencies, and environment configuration; used Git/GitHub for version control.

EDUCATION

B.Sc. in Computer Science | MSA University, in collaboration with the University of Greenwich | Graduated Jan 2026

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Very Good / B2) **Target roles:** IT Support Engineer, IT Operations, Help Desk / Service Desk, Junior Systems Administrator, Junior Data Analyst
